

Open House Search

The "Open House Search" provides a "General Criteria" search page with criteria that is common to all "Property Types."

To start your search, enter the "Open House Dates." You can either manually change the dates using the format **mm/dd/yy** or **mmddy** or use the **Calendar Selector ICON**. (Recommended)

"Property Type" check-off boxes appear next on the page. Select "Property Type(s)" by clicking on their respective check-off boxes .

Note! If you select only one Property Type, "Property Subtype" check-off boxes will appear and an "Additional Criteria" page will be available.

For example, check-off Property Type "Residential," and "Property Subtype" check-off boxes for "Single Family," "Condominium" and "Farm" appear.

Recommended: The "Mapping" feature lets you search for listings based on their location on a map (geo-codes) or proximity to a particular address.

- ▶ **Recommended Method:** Simply click on the map and drag your mouse to draw a rectangular selection on the map. Repeat until the desired area is selected.

- ▶ **Alternatively:** Under the map, enter the Street #, (complete) Street Name and Zip Code to zoom in to that location. Click "Refresh." Then Click on the map and drag your mouse to draw a rectangular selection on the map.

Alternate Method to using the Map to define the location of your search. (Do NOT use both methods in the same search!)

Use the "Suburbs," "Zip Codes" or "Counties," or "Districts" fields to define a location. **Hint!** Use only one of these fields. "Suburbs" is recommended, but will be available only if one Property Type is selected. Click on the **Select Suburbs ICON** to select from a suburb list. (Required)

"Bedrooms," "Full Baths," "Partial (or Half Baths)" and "Total Baths" use pull-down selectors. **Hint!** "Total Baths" is an addition of "Full" and "Partial" baths. **Note!** Use these fields for **Residential** Property Type searches **ONLY!** "Lot Size" is entered in "acres." "Age" is entered in "years."

Click the "Submit" button to go directly to the search results, or click the "Additional Criteria" tab to enter additional criteria.

Note! In order to optimize system performance, the maximum number of listings allowed is **100**.

The screenshot shows the CincyMLS.net Open Houses search interface. Key features and annotations include:

- Calendar Selector:** A calendar for May 2009 is visible, with a red circle around it and an arrow pointing to the "Open House Dates" field.
- Submit and Preview Count:** Buttons for "Submit" and "Preview Count" are circled in red.
- Property Types:** Checkboxes for "Residential" (checked), "Commercial", and "Multi Family" are shown. Below, "Property Subtypes" include "Single Family" (checked) and "Farm".
- Mapping:** A map of a residential area is shown with a red rectangular selection box. Below the map are fields for "Longitude" (-84.28264617) and "Latitude" (39.264689724).
- Address Search:** Fields for "Street #", "Direction", "Street Name", "Suffix", "Post Direction", "City", "State", and "ZIP Code" are present, along with a "Refresh" button.
- Filters:** Fields for "Suburbs", "ZIP Codes", "Counties", "Districts", "Schools", "Price" (125,000 Thru 225,000), "Bedrooms", "Full Baths", "Lot Size", "Age", "Total Baths", and "Half Baths" are visible.
- Additional Addresses:** A section for "Additional Addresses" with fields for "#", "Street #", "Direction", "Street Name", "Suffix", "Post Direction", and search options "Begins with", "Exact", and "Contains".

Additional Criteria

(Enter only if you must have!)

Selecting from a pull-down list or entering text features:

If you select a choice from a pull-down list or manually type in a text feature, you do not have to check the Include check-off box. The system assumes you want the selection included in the your results. In the examples to the right: For the feature "New Construction" (Yes or No), "Yes" was selected from the pull-down list. For the feature "Garage Spaces," "2" was manually entered. (leaving the thru blank, searches for 2 or more garage spaces) In both examples, in is not necessary to check-off the include check-off box.

To select choices to be included for a multiple choice feature:

Check-off the "Include" box next to a desired choice. Only listings that have that choice will be included in your results. In the example to the right: For the feature "Levels," the choices "2 Story," "3 Story," "Quad-Level" are checked-off to be included. This instructs the computer to select properties that are "2 Story" OR "3 Story" OR "Quad-Level."

To select choices to be exclude for a multiple choice feature:

Check-off the "Exclude" box next to any choice you want listings NOT to have. In the example to the right: For the feature "Basement," the choice "None" is checked off to be excluded. This instructs the computer to select properties where the "Basement" is described as "Full" or "Partial" or "Crawl" but not described as "None."

To select and Require All choices for a multiple choice feature:

Check-off the "Require all ✓s" check off box. In the example: For the feature "Garage," if the choices "Attached" and "Oversized" are checked off as well as the "Require all ✓s". This instructs the computer to select properties that have BOTH a "Attached" AND "Oversized" garage.

Click the "Search" button to go directly to the search results, or click the "General Criteria" tab to enter or modify general criteria.

Note! In order to optimize system performance, the maximum number of listings allowed is 100.
